

Hyperscale Green Data Center Sahara Neural Hub

Sovereign African Data Storage & Decentralized High-Performance
Computing — Dakhla, Morocco

Comprehensive feasibility analysis for a 50 MW AI-ready hyperscale data center powered by 100% renewable energy (wind + solar + BESS), leveraging Dakhla's world-class wind resources (LCOE \$0.022/kWh), operational submarine cable connectivity (20-40 Tbps to Europe & West Africa), and Dakhla West Africa Free Zone tax advantages. Total estimated CAPEX: \$611M - \$1.135B. Projected IRR: 12-18%.
